POWER X-CHANGE

YOUR BENEFITS

CORDLESS FREEDOM FOR POWER TOOLS AND GARDEN.

Simply click the battery into place and off you go – be it with a lawn mower, an impact drill or a wet & dry vac. Cordless freedom is a joy.

STATE-OF-THE-ART ENGINEERING. TRIED-AND-TESTED QUALITY.

Our rechargeable batteries are manufactured from only the best components such as high-performance new-generation cells and our intelligent processor- controlled battery electronics. Their quality has been confirmed by **Stiftung Warentest**, for example with its “Test Winner” award for the Power X-Change 2.0 Ah battery.

POWERFUL TOOLS. DURABLE BATTERIES.

Less power? No way! Our cordless tools for real trailblazers are equipped with up to 2700 watts of battery power and are therefore in no way inferior to their corded counterparts!

1 BATTERY. 1000 POSSIBILITIES. EVERYTHING FROM PRUNING SAWS TO MITER SAWS.

The Power X-Change family already contains over **200 tools and items of garden equipment** – and the number is constantly rising. Thanks to the versatile system of rechargeable batteries, the E-Kickscooter from our cooperation partner GOVECS is now also “powered by Power X-Change”.

POWER X-CHANGE

**1 BATTERY.
1000 POSSIBILITIES.**

**FREELEXO.
MORE FREEDOM.**

Our compatibility promise.

As well as in the robot lawn mowers, the battery pack will also fit in all other tools and units in the Power X-Change System.

FREELEXO. THE SERIES AT A GLANCE.

EINHELL ROBOT LAWN MOWER SERIES. FREELEXO

SUSTAINABLE

Thanks to **mulching function**. The chopped-up cut grass drops down to the sward, where it acts as a **natural fertilizer** down into the roots and protects the lawn.

AUTONOMOUS

The Freelexo **automatically** returns to and gets **charged up** by the charging unit if required.

ADAPTABLE

Also suitable for bumpy gardens – **with the ability to master slopes of up to 35%**.

MORE THAN JUST A ROBOT LAWN MOWER. THE BEST FEATURES IN BRIEF.

INDIVIDUAL

The Freelexo is controlled via **app** by **Bluetooth** – the operating time can be precisely programmed for each specific day.

VARIABLE

With the mowing program for **secondary areas** you can also provide optimum care for areas **separated from the main garden**.

SAFE

Impact, tilt and lift sensors automatically detect obstructions.

FLEXIBLE

Tight spots up to 80 cm between perimeter cables are also no problem for the robot lawn mowers in the Freelexo series.

SPOT ON

Thanks to the **spot mowing** function you can pin-point the cutting of **hard-to-reach areas** such as under garden furniture.

VERSATILE

Using the **multi-zone mowing mode**, the robot lawn mowers are even suitable for **irregularly shaped gardens**.

ENERGY-EFFICIENT

In **Eco Mode** the loop signal switches off automatically as soon as the robot lawn mower is in the charging station. This **saves you money** and **protects the environment**.

INTUITIVE

Control inputs via the intuitive **keypad** or **LCD display**. PIN code for anti-theft protection.

BEAUTIFUL LAWN AT THE PUSH OF A BUTTON.

DOWNLOAD THE FREE APP!

APP

Thanks to Bluetooth functionality, Freelexo robot lawn mowers offer individual adjustment options that you can access and set up comfortably from a smartphone app. Use these options to start the robot lawn mower, to set fixed mowing times, to look at statistics and define many more practical settings – just how you want them.

Fancy a look at the app?
Download the iOS or Android app and activate demo mode.

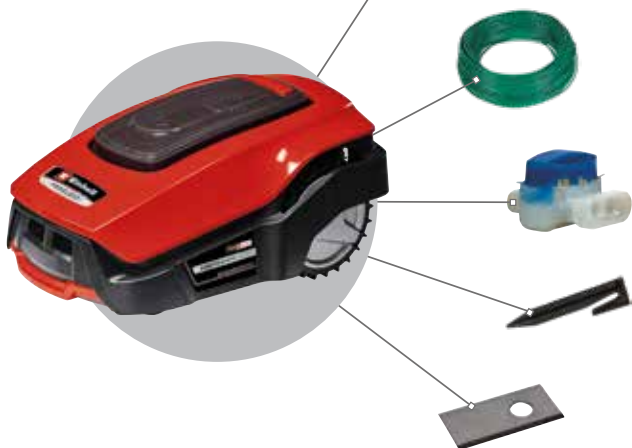

ROBOT LAWN MOWERS ACCESSORIES – JUST IN CASE.

GARAGE

- For protection from sun and rain
- With good air circulation
- With flap function for easy access

S E R V I C E

FAQ – FREQUENTLY ASKED QUESTIONS.

WHAT PRINCIPLE DOES THE ROBOT LAWN MOWER FOLLOW?

Robot lawn mowers operate on a random principle. If the mower reaches an obstruction or the perimeter wire, it rotates in a random direction and continues its work,. In addition, the the mower switches into a spiral mode several times during every working window in order to improve the efficiency of the random principle.

IS THE ROBOT ALSO SUITABLE FOR MORE COMPLEX GARDENS?

Thanks to the Multi-area Mowing Function, even complex gardens can be mowed reliably. Various starting positions can be defined with this function. This allows the mower to move through narrow corridors and reach even areas at awkward angles. The robot lawn mower covers the distance to the starting point on the perimeter wire and then starts with the actual mowing process once it reaches the target zone.

WHAT IS THE MAXIMUM SLOPE THAT THE MOWER CAN DEAL WITH?

The robot lawn mower can handle slopes of up to 35%.

WHAT FUNCTIONS DOES THE CORRESPONDING APP OFFER?

In addition to normal operation, you can also establish a connection to the device via Bluetooth. As well as controlling the robot lawn mower, checking the settings and programming the mower, you can also view its current status and statistics.

HOW CAN THE PERIMETER WIRE BE ROUTED?

The perimeter wire can be routed either above ground or at a depth of up to 5 cm in the soil. We recommend installation above ground so that you can still make corrections easily during the first few days of use. The wire will be overgrown within a few weeks and almost impossible to see.

IS THE ROBOT LAWN MOWER RAIN PROOF?

Rain is not a problem for Einhell robot lawn mowers. However, thanks to the built-in rain sensor, if it does rain the mower will return to the charging station to protect the lawn.
